

Basic paediatric stoma care guidelines: kids

As a part of their ongoing commitment to supporting healthcare professionals and improving the quality of life for children with a stoma and their families, the Global Paediatric Stoma Nurses Advisory Board (GPSNAB) has developed a one-pager covering basic paediatric stoma care guidelines for this patient group.

This one-pager is intended for nurses and other healthcare professionals working with children, and provides an overview of basic treatment principles – including topics such as peristomal skin care, pouch application and discharge information.

We hope you will find the attached one-pager useful in your work with children with stomas. For more in-depth information, please consult **Paediatric stoma care**. **Global best practice guidelines for neonates, children and teenagers**, available at [Coloplast Professional](https://www.coloplast.com/uk/professional)
